<b>Entrance and purpose</b>	This document contains entire certification process and EBS logo and certification usage. This document is public and valid for interesting parties who are willing to cooperate or actually cooperate with EBS, also for entities that are certified by EBS. The Certificate is public and EBS ownership, which witnesses that the organisation fulfils certain standard demands and requests. While the certification is public, any one reserves the right to verify the process and its validity. Every Certificate is issued due to a series of procedures from EBS, but this document (procedure) describes its key steps.
<b>Audit Process:</b>	
<b>Term and Definition</b>	<p>Opportunity for improvement (OFI). Where the auditor feels that there is a potential non-conformity but cannot provide objective evidence to prove it (for guidance only)</p> <p>CAR Corrective Action Request. Written notification to a Client of non-compliance identified during an audit. These will be classified either major or minor non-conformity.</p> <p>Minor non-conformity Non-conformity (non-fulfilment of a requirement) that does not affect the capability of the management system to achieve the intended results.</p>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>2/45</b>

	<p><b>Major non-conformity</b>  Non-conformity (non-fulfilment of a requirement) that affects the capability of the management system to achieve the intended results.</p> <p>Note: Non-conformities could be classified as major in the following circumstances:  — if there is a significant doubt that effective process control is in place, or that products or services will meet specified requirements; a number of minor non-conformities associated with the same requirement or issue could demonstrate a systemic failure and thus constitute a major non-conformity.</p> <p>Root cause analysis (RCA) A root cause is a factor that caused non-conformity and should be permanently eliminated through process improvement. Root cause analysis is a collective term that describes a wide range of approaches, tools, and techniques used to uncover causes of problems e.g. 5 Whys is an iterative interrogative technique used to explore the cause-and-effect relationships underlying a particular problem. The primary goal of the technique is to determine the root cause of a defect.</p>
<b>Audit Criteria</b>	Standard on Auditing and Customer Management system documentation created by and defined processes.
<b>Scope of the audit</b>	The objective of the audit is to assess the intent, implementation, operation and effectiveness (if any) of the management system (s) to demonstrate compliance with relevant standards and other related business requirements. This audit covers the processes identified in the visit plan and within the three-year program. The verification will be carried out at the place (s) indicated in the visit plan
<b>Objectives of the audit</b>	<ul style="list-style-type: none"> <li>- To confirm that the management system conforms with the requirements of the auditing standard and any statutory, regulatory and contractual requirements that are applicable;</li> <li>- To confirm that the organisation has effectively implemented the planned management system;</li> <li>- To confirm that the management system is meeting its specified objectives</li> <li>- Reviewing the appropriateness of the standard requirements and deficiencies, reporting on opportunities for improvement</li> </ul> <p>Details for Objectives see F 10-09, for example of Objectives the Surveillance audit: Surveillance audits are on-site audits, but are not necessarily full system audits, and shall be planned together with the other surveillance activities so that the certification body can maintain confidence that the client's certified management system continues to fulfil requirements between recertification audits.</p> <p>Each surveillance for the relevant management system standard shall include:</p> <ol style="list-style-type: none"> <li>a) Internal audits and management review;</li> <li>b) A review of actions taken on nonconformities identified during the previous audit;</li> </ol>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>3/45</b>

	<p>c) Complaints handling;</p> <p>d) Effectiveness of the management system with regard to achieving the certified client's objectives and the intended results of the respective management system (s);</p> <p>e) Progress of planned activities aimed at continual improvement;</p> <p>f) Continuing operational control;</p> <p>g) Review of any changes;</p> <p>h) Use of Logo and/or any other reference to certification.</p>
<b>Procedures for Management Systems Certification</b>	<p>The important steps of the certificate process: Application form</p> <p>Application is a form completed by the client to which applies a certain service.</p> <p>- Review of Application and Contract</p> <p>This process is reviewed by us to determine our possibilities for the realization of the request applied by the client. The client is informed in advance and if he agrees with our service, he signs a contract.</p> <p>- Project for Realization, Contract and Payment Process</p> <p>- Stage 1 Audit (Of Site/ ON Site / Online)</p> <p>Site verification as per the standard guidelines</p> <p>After planning or closing nonconformities, proceed to stage 2. See details of nonconformities below.</p> <p>- Stage 2 Audit (ON Site / Online)</p> <p>In this certification stage, our auditors make the assessment to verification for each point of the standards to prove that the organization has implemented.</p> <p>- Closed Non-conformity, if have. See details of nonconformities below.</p> <p>During the process there may be discrepancies or nonconformities from the required results or based on standards, which should be improved by the client and the process repeated partially or completely.</p> <p>- Follow-up / Special audit, if necessary, before or after issued certificates</p> <p>If after the completion of the process or after the issuance of the certificate, the client has changed (address, production methodology, etc.) then we must carry out a special control. For this, the company must inform in advance.</p> <p>- Issued Certificates</p> <p>Issuance of the certificate is valid for 3 years, but if during the surveillance audit the results are satisfactory.</p> <p>Certificate verification can be done in the office or directly on the official website. <a href="http://www.ebscontrol.com">www.ebscontrol.com</a></p> <p>The Certificate: Printed version of the electronic form certificate be considered as a copy for business purposes. After an audit for any change in</p>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>4/45</b>

	<p>scope or others, a new certificate is issued by EBS. If have a change in this certificate, the certificate remained invalid, this document is certificate issued based on EBS Procedures and remains the property of EBS. The certificate is issued by Accredited Body: EBS Registrars LLC, 400 Rella Blvd. St. 207-298, 10901, Montebello, New York, USA, Key Location: EBS Exzellenz BewertungsSysteme GmbH, Winterstraße 2a, 50354 Hürth, Köln, Germany</p> <p>Certification cycle is three years, and remains valid subject to satisfactory annual surveillance audits.</p> <p><b>- First Surveillance Audit</b> To continue the validity of the certificate requires an annual surveillance audit.</p> <p>The first surveillance audit is usually conducted 6-12 months after the initial issuance of certification and serves as a way to ensure that the organization continues to meet the requirements of the standard and is maintaining its system. Typically, companies choose an initial audit every 12 months before the surveillance audit date. If the surveillance audit date passes, it is automatically declared invalid.</p> <p><b>- Second Surveillance Audit</b> To continue the validity of the certificate requires annual surveillance audit to re-certification.</p> <p>The second surveillance audit is similar to the first surveillance audit, but takes place one year after the first surveillance audit, according to the date set for surveillance audit 2, and serves to verify whether the organization continues to meet the requirements of the relevant standard. However, there may be some additional elements depending on the progress made since the first surveillance audit. The second satisfactory surveillance audit concludes the 3-year cycle of certification validity.</p> <p><b>- Re-Certification</b> After completing the 3-year cycle, the recertification process continues for the next 3 years. Continuing from stage 2, first and second surveillance as explained above. The recertification audit (stage 2) must be carried out 2 months before the expiry of the initial certificate.</p>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>5/45</b>

<b>Closed Non-conformity and Certification is recommended</b>	<p>Any inadequacy with the requirements of the respective standard it is called non-conformity. They can be small (minor), large (major) or critical</p> <p>Minor non-conformities can be corrected easily and don't have impact on how the process or Managing system flows.</p> <p>The Certificate is issued only when the client has made a plan to remove one or more minor non-conformities. Control and verification about the correction and removal of minor non-conformities will be from certification body at next audit.</p> <p>At stage 1 if the client has non-conformities such as Policy Definition, Objectives, internal audit report and the carrying out the management review, it will not be possible to proceed to Stage 2.</p> <p>major non-conformities at Stage 2 can be non-conformities that do not comply with policies, objectives and client demands:</p> <p>If the non-conformity is major, the client should plan to correct them and execute them. planning, closing and efficiency of the process must be 2 months before the certificate is issued. EBS Certification body can give extra one month time and after that time can automatically terminate the certification process if correction of major non-conformities at next audit fails to fulfil them.</p> <p>If the client executes corrective actions as it is described and detailed by Lead auditor, the verification will be held at next yearly audit. If even annually review major non-conformities are found (others than last review), same procedure will take in place.</p> <p>After Follow up/ On site audit, the auditor can recommend that a Certificate can be issued.</p>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>6/45</b>

<b>Audit Result for Lead Auditor,</b> <b>Reason:</b>	<b>Certification is recommended</b> The Management System are complies requirements of the standard, Lead Auditor is pleased to put forward a recommendation for issuance of certificate. <b>Planned date of next audit:</b>
<b>Reason:</b>	<b>Follow-up audit (off-site)</b> The Management System complies with the requirements of the standard with exception of MINOR non conformities: Number of the Observer or MINOR non conformities: _____ The recommendation for Certification from Lead Auditor will be upon off-site verification of closure of all issues, the NC closure need to be submitted along with the Corrective Action Plan F 10-13 and objective evidence two weeks from the stage 2 audit but not later than two months from the date of Stage 2 audit. If all non-conformances are not closed within two months, a full reassessment may be required. <b>Plan date:</b>
<b>Reason:</b>	<b>Follow-up audit (on-site)</b> The management of the system is documented and implemented according to the requirements of the standard, however, there is _____ Major non-conformity. Evidence MAJOR: non conformities, -the Lead auditor will realize one Follow-up audit (on-site), will be scheduled to allow for on-site verification and closure of all issues within two months from the date of Stage 2 audit. If all non-conformances are not closed within two months, a full reassessment may be required.. <b>Plan date of evidence:</b>
<b>Reason:</b>	<b>Certificate Not-recommendation</b> Follow-up Audit Stage 2, it is necessary to demonstrate the efficient operation of the management system and the closure of all non-conformity and inconveniences of risk. To progress your application for process of the certification, please respond to each non-conformances, with a plan showing proposed actions, timescales and responsibilities for resolution, not later than six months, from the preliminary audit Stage-2. The organization should consider the root cause of the non-conformance and the potential for related issues in other parts of management system, and the cost of the audit. With the audit satisfied by the audit, the lead auditor will prepare a new F 10-15 report and recommend the issuance of the certificate. <b>Organization Plan date:</b>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>7/45</b>

<b>Certification issues</b>	For each certification audit and re-audit, the Lead Auditor shall submit to the certification body as part of the audit report the certification recommendation for recommendation or rejection for certification or recertification.
<b>Lead Auditors approval / rejection of certification F 10-09</b>	<p>The Lead Auditors recommendation shall be based upon the auditors Management System meeting the following criteria:</p> <p>Management Systems:</p> <p>For a recommendation, to certificate an operator with a newly introduced or re-audited management system, the following degree of development or maintenance must have been achieved;</p> <p>a) To be certified an organisation has to demonstrate that the management system functions and the various control mechanisms are properly operational. In practice this means in particular that:</p> <ul style="list-style-type: none"> <li>* The management system has been operational for a minimum of three months;</li> <li>* The internal audit system is fully operational and can be shown to be effective;</li> <li>* One management review has been conducted.</li> </ul> <p>b) A certificate can only be issued or re-issued if, in particular:</p> <ul style="list-style-type: none"> <li>* any non conformities identified have been addressed and any major non conformities have been eliminated;</li> <li>* The certification body has justified confidence that all provisions in the standard have been met, and in particular that provision for compliance with the organisation's policy objectives and standard requirements is effective.</li> <li>* All staff has been made aware of the organisation's policy objectives and standard requirements.</li> <li>* All key staff (those involved in managing standard requirements) have undersigned a training needs analysis, and have received training accordingly.</li> </ul>
<b>Review of Lead Auditors recommendations</b>	<p>The EBS shall Review the lead auditors report and associated material along with the reasons for the recommendation/rejection certification of a client, and sign it. For agreement of approval or rejection to the certification committee for them to endorse. A Committee Review may be required if the EBS Representative does not have the scope approval for the certification.</p> <p>The EBS General Manager can authorize the EBS Manager representative to approve for certifications, or use own electronic signature.</p>
<b>Decision in Relation to the Certification Function</b>	<p>Decision in Relation to the Certification Function</p> <p>The certification approver /committee shall review each certification audit or re-audit process, the reports, and any relevant material and endorse the recommendation for approval or rejection. The approver (committee) shall grant approval for a certificate of Approval providing that:</p> <ul style="list-style-type: none"> <li>* The information provided by the audit team is sufficient with respect to the certification requirements and the scope for certification;</li> </ul>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>8/45</b>

	<p>* For any major non-conformities, it has reviewed, accepted, and verified the correction and corrective actions;</p> <p>* For any minor non-conformity it has reviewed and accepted the client's plan for correction and corrective action.</p> <p>The approval pack will contain copies of (see page 1)</p> <p>If the organization (client) is not able to verify the implementation of corrections and corrective actions of any major nonconformity within 2-3 months after the last day of stage 2, the certification body shall conduct another Audit (special Audit) prior to recommending certification.</p> <p>The first three-year certification cycle begins with the certification decision. Subsequent cycles begin with the recertification decision.</p> <p>Certification cycle, see above.</p> <p>Each Certificate carry a unique identification number.</p> <p>Details of each certificate used, cancelled or destroyed shall be recorded in a Certificate Register, as well as will be public on the official website.</p> <p>The EBS shall send a certificate copy by e-mail and by post (if needed) at the address specified by the client.</p> <p><u>A copy of the Certificate shall be retained on the Client file.</u></p>
<b>Suspending, withdrawing or reducing of the scope of certification</b>	<p>The EBS shall suspend certification in cases when:</p> <ul style="list-style-type: none"> <li>• The client's certified management system has persistently failed to meet certification requirements, including requirements for the effectiveness of the management system;</li> <li>• The certified client does not allow surveillance or recertification audits to be conducted at the required frequencies;</li> <li>• The certified client has voluntarily requested a suspension.</li> <li>• The client/certificate holder is formally informed in writing about the failure of compliance to conditions and asked to detail corrective action.</li> <li>• If the client refuses to respond to correct the failure of non-compliance to the above conditions, then the EBS Representative shall inform the client by letter that the certificate may be suspended initially for 6 months and after 6 months the client is informed that the certificate is cancelled and would the client return the certificates and cease to use and distribute any literature, stationary, etc., referencing the certificate of EBS Certification Body Logo/symbol.</li> </ul> <p>Under suspension, the client's management system certification is temporarily invalid.</p> <p>EBS shall restore the suspended certification if the issue that has resulted in the suspension has been resolved. Failure to resolve the issues that have resulted in the suspension in a time established by the certification body shall result in withdrawal</p>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>9/45</b>

	<p>or reduction of the scope of certification.</p> <p>EBS shall reduce the scope of certification to exclude the parts not meeting the requirements, when the certified client has persistently or seriously failed to meet the certification requirements for those parts of the scope of certification. Any such reduction shall be in line with the requirements of the standard used for certification.</p>
<b>Non-accredited certificates</b>	<p>EBS shall not issue any non-accredited certificates in the scopes for which they hold EBS accreditation. Where accreditation only covers part of an IAF EA scope (i.e. limited scope) then EBS can issue non-accredited certificates for activities falling outside of the limitation.</p> <p>Non-accredited certificates can be issued for new scope areas where EBS is working towards accreditation. However, once the accreditation is granted, EBS is required to take appropriate action to transfer the previously issued non-accredited certificates to accredited ones within 30 days. These actions may require EBS to carry out a review and additional validation activities of each certificate before confirming its accredited status.</p>
<b>Instruction fo EBS Logo and AB Logo on certificates</b>	<p>The Logo and logo shall always be used in conjunction with the Client's name and have the certificate number adjacent to it.</p> <p><b>Reference to certification and use of marks</b></p> <ul style="list-style-type: none"> <li>- EBS will have rules governing any management systems third party mark that it authorizes certified clients to use. These rules will assure, among other things, traceability back to EBS. There will be no ambiguity in the mark or the accompanying text, as to what has been certified and which certification body has granted the certification. This mark will not be used on a product or product packaging, or in any other way that may be interpreted as denoting product conformity.</li> <li>- EBS will not permit its marks to be applied to laboratory tests, calibration or inspection reports or certificates.</li> <li>- The EBS Certification body shall have rules governing the use of any statement on product packaging or in accompanying information that the certified client has a certified management system. Product packaging is considered as that which can be removed without the product disintegrating or being damaged. Accompanying information is considered as separately available or easily detachable. Type labels or identification plates are considered as part of the product. The statement shall in no way imply that the product, process or service is certified by this means. The statement shall include reference to: <ul style="list-style-type: none"> <li>— identification (e.g. brand or name) of the certified client;</li> </ul> </li> </ul>

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>10/45</b>

	<p>— the type of management system (e.g. quality, environment) and the applicable standard;</p> <p>— the certification body issuing the certificate.</p> <p>a) The EBS and Accreditation Body logo shall only be displayed together on all issued certificates.</p> <p>(b) The Logo may be reproduced in any size or single colour provided the configuration is strictly adhered to, including the frame.</p> <p>(c) The Logo may be used on stationery, such as headed letter paper and advertising brochures, and only in connection with the International Quality System Standard scope of supply listed on the certificate.</p> <p>(d) The Logo shall not be used on flags, buildings, vehicles, packaging, directly on products, nor on promotional products such as calendars, diaries, coasters, etc.</p> <p>(e) The Logo shall not be used in any way to imply product approval, or on documentation such as test certificates and certificates of conformity.</p> <p>(f) The certificated Client shall, upon reasonable notice, discontinue any use of the Logo which is considered to be unacceptable to the EBS.</p> <p>(g) Upon termination of the certification, for whatever reason, the Client shall discontinue all use of the Logo immediately.</p> <p>(h) The accreditation body (AB) logo cannot be used in any way by the certified client.</p>
Logo in FSMS Certificate, Based on Standard ISO 2203-1:2022	<p>Based on Standard ISO 2203-1:2022 point 8.3, The EBS as certification body shall not authorize the use of the FSMS certification mark on the product nor the product packaging. In the context of this document, product packaging referred to in ISO/IEC 17021-1:2015, 8.3, shall cover all product packaging, both primary packaging (which contains the product) and any outer or secondary packaging.</p> <p>Based on Standard ISO 2203-1:2022 point 8.4, The EBS as certification body shall not permit the use of any statement on product packaging that the client has a certified FSMS. This includes all product packaging, both primary packaging (which contains the product) and any outer or secondary packaging.</p>

## ISO 9001:2015 QMS CALCULATION OF AUDIT TIME

Source: IAF MD 5:2023 and ISO 17021-3

AND OTHERS STANDARDS (THE STANDARDS BELOW ARE NOT INCLUDED)

**Table QMS 1 – Quality Management Systems Relationship between Effective Number of Personnel and Audit Time (Initial Audit only)**

Effective Number of Personnel	Audit Time Stage 1 + Stage 2 (days)	Effective Number of Personnel	Audit Time Stage 1 + Stage 2 (days)
1-5	1.5	626-875	12
6-10	2	876-1175	13
11-15	2.5	1176-1550	14
16-25	3	1551-2025	15
26-45	4	2026-2675	16
46-65	5	2676-3450	17
66-85	6	3451-4350	18
86-125	7	4351-5450	19
126-175	8	5451-6800	20
176-275	9	6801-8500	21
276-425	10	8501-10700	22
426-625	11	>10700	Follow progression above

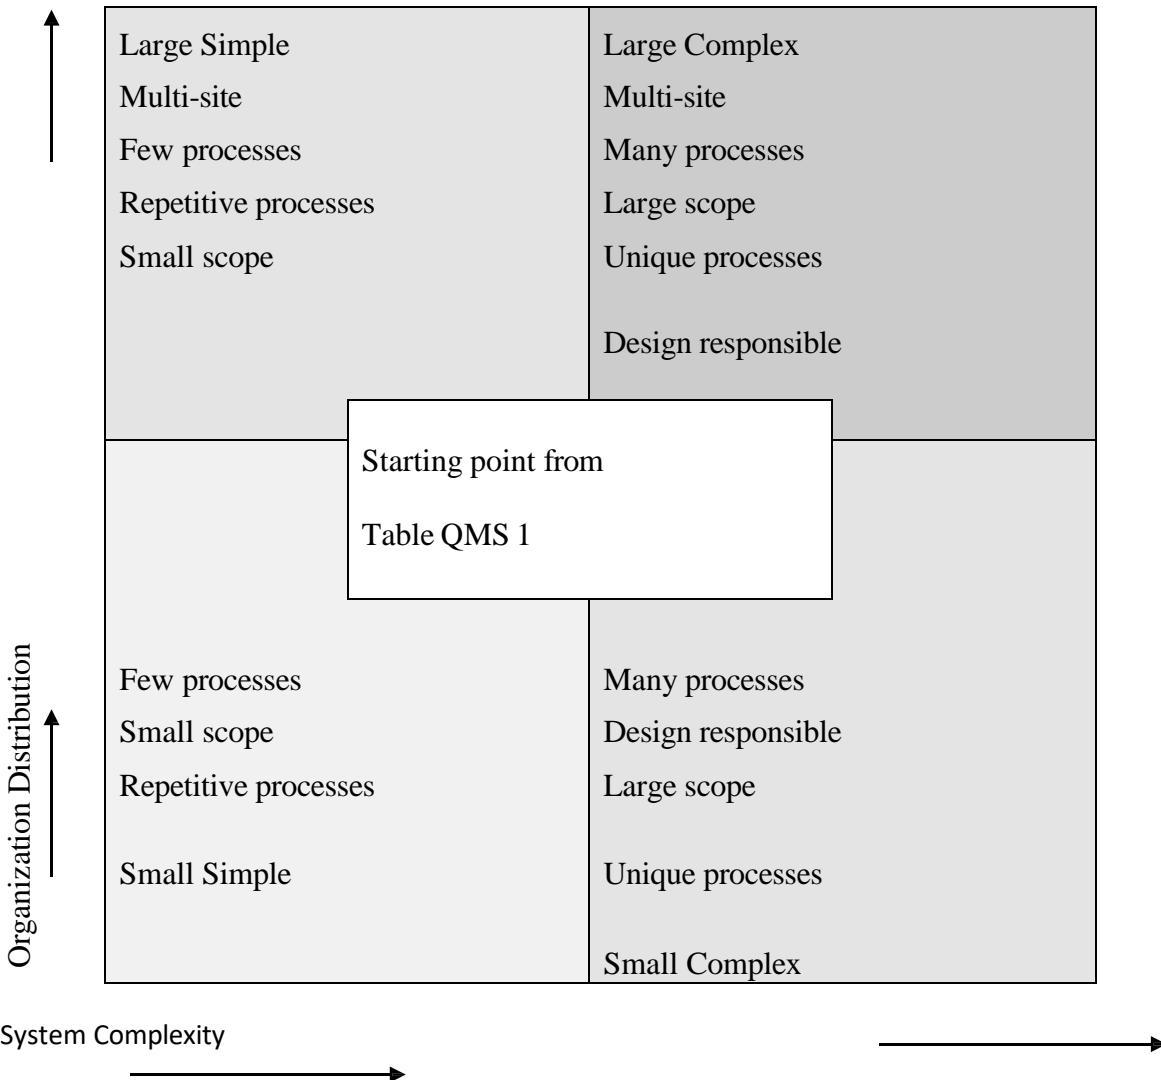

**Note 1:** The numbers of personnel in Table QMS 1 should be seen as a continuum rather than a stepped change. I.e. if drawn as a graph, the line should start with the values in the lower band and end with the endpoints of each band. The starting point of the graph should be personnel of 1 attracting 1.5 days. See clause 2.2 for dealing with parts of a day. See in IAF MD 5:2023

**Note 2:** The CAB's procedure may provide for calculation of audit time for a number of personnel exceeding 10700. Such time should follow the progression in Table QMS 1 in a consistent fashion.

**Note 3:** See also clause 1.9 and 2.3. See in IAF MD 5:2019 Issue 4

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>14/45</b>

**Figure QMS 1 – Relationship between Complexity and Audit Time**

### **QMS – Examples of Risk Categories**

These risk categories are not definitive; they are examples only that could be used by a CB when determining the risk category of an audit

Note 1: It is expected that business activities defined as low risk may require less audit time than the time calculated using Table QMS 1, activities defined as medium risk will take the time calculated using Table QMS 1, and activities defined as high risk will take more time.

Note 2: If a company is providing a mixture of business activities (e.g.: construction company that builds simple construction – medium risk - and bridges – high risk), it is up to the CAB to determine the correct audit time, taking into consideration the number of personnel involved in each of the activities.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo			
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Version: <b>06/05.09.2025</b>	Page <b>15/45</b>	

**High Risk:**

Where failure of the product or service causes economic catastrophe, or puts life at risk. Examples include but are not limited to:

Food; pharmaceuticals; aircraft; shipbuilding; load bearing components and structures; complex construction activity; electrical and gas equipment; medical and health services; fishing; nuclear fuel; chemicals, chemical products and fibres.

**Medium Risk:**

Where failure of the product or service could cause injury or illness. Examples include but are not limited to:

Non load bearing components and structures; simple construction activities; basic metals and fabricated products; non-metallic products; furniture; optical equipment; leisure and personal services.

**Low Risk:**

Where failure of the product or service is unlikely to cause injury or illness. Examples include but are not limited to:

Textiles and clothing; pulp, paper and paper products; publishing; office services; education; retailing, hotels and restaurants.

## COMPLEXITY CATEGORIES OF ENVIRONMENTAL ASPECTS

The provisions specified in this document are based on five primary complexity categories of the nature and gravity of the environmental aspects of an organization that fundamentally affect the audit time. These are:  
**High** – environmental aspects with significant nature and gravity (typically manufacturing or processing type organizations with significant impacts in several of the environmental aspects);

**Medium** – environmental aspects with medium nature and gravity (typically manufacturing organizations with significant impacts in some of the environmental aspects);

**Low** – environmental aspects with low nature and gravity (typically organizations of an assembly type environment with few significant aspects);

**Limited** – environmental aspects with limited nature and gravity (typically organizations of an office type environment);

**Special** – these require additional and unique consideration at the audit planning stage.

Table EMS 1 covers the above four top complexity categories: high, medium, low, and limited. Table EMS 2 provides the link between the five complexity categories above and the industry sectors that would typically fall into that category.

The CAB should recognise that not all organizations in a specific sector will always fall in the same complexity category. The CAB should allow flexibility in its application review procedure to ensure that the specific activities of the organization are considered in determining the complexity category. For example, even though many businesses in the chemical sector should be classified as “high complexity”, an organization which would have only a mixing free from chemical reaction or emission and/or trading operation could be classified as “medium” or even “low complexity”. The CAB shall document all cases where they have lowered the complexity category for an organization in a specific sector.

Table EMS 1 does not cover the “special complexity” category and the audit time of management systems audits shall be developed and justified on an individual basis in these cases.

<b>Low</b>	<ul style="list-style-type: none"> <li>• corporate activities and management, HQ and management of holding companies</li> <li>• wholesale and retail (depending on the product, could be medium or high, e.g. fuel)</li> <li>• general business services except industrial cleaning, hygiene cleaning, dry cleaning and education services).</li> <li>• transport and distribution - management services with no actual fleet to manage</li> <li>• engineering services (could be medium depending on type of services)</li> <li>• telecommunications and post office services</li> <li>• restaurants and campings</li> <li>• commercial estate agency, estate management</li> <li>• research &amp; development on social sciences and humanities</li> <li>• public administration, local authorities</li> <li>• financial institutions, advertising agency</li> </ul>

### Complexity Categories of OH&S Risks

The provisions specified in this document are based on three primary complexity categories of OH&S risks based on the nature and severity of the OH&S risks of an organization that

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	<b>Page 21/45</b>

fundamentally affect the auditor time. These are:

- **High** – OH&S risks with significant nature and severity (typically the construction industry, heavy manufacturing or processing type organizations),
- **Medium** – OH&S risks with medium nature and severity (typically light manufacturing organizations with some significant risks), and
- **Low** – OH&S risks with low nature and severity (typically office based organizations).

Table OH&SMS 1 covers the above three complexity categories of OH&S risks.

Table OH&SMS 2 provides the link between the three complexity categories of OH&S risks above and the industry sectors that would typically fall into that category.

The CAB should recognize that not all organizations in a specific sector will always fall in the same OH&S risk category. The CAB should allow flexibility in its contract review procedure to ensure that the specific activities of the organization are considered in determining the complexity categories of OH&S risks.

For example, even though many businesses in shipbuilding should be classified as “high risk”, an organization which would have only small boats of carbon fiber with lower complexity activities could be classified as “medium”.

The CAB shall document all cases where they have lowered the complexity category of OH&S risks of an organization in a specific business sector.

*Note: The complexity category of OH&S risk of an organization may also be associated with the consequences of a failure of the OH&SMS to control the risk:*

- High – where failure to manage the risk could put life at risk or result in serious injury or illness,
- Medium – where failure to manage the risk could result in injury or illness, and
- Low – where failure to manage the risk may result in minor injury or illness.

Source: ISO/IEC 27006-1:2024

#### - Factors for adjustment of audit time / Source: ISO/IEC 27006-1:2024

The audit time chart shall not be used in isolation. The time allocated shall also consider the following factors which relate to the complexity of the ISMS and therefore to the effort needed to audit the ISMS:

- complexity of the ISMS (e.g. criticality of information, risk situation of the ISMS, etc.);
- the type(s) of business performed within scope of the ISMS;
- previously demonstrated performance of the ISMS;
- extent and diversity of technology utilized in the implementation of the various components of the ISMS (e.g. number of different IT platforms, number of segregated networks);
- extent of outsourcing and third party arrangements used within the scope of the ISMS;
- extent of information system development;
- number of sites and number of Disaster Recovery (DR) sites;

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	<b>Page 23/45</b>

h) for surveillance or re-certification audit: The amount and extent of change relevant to the ISMS in accordance with ISO/IEC 17021-1, 8.5.3.

**Additional example factors requiring additional audit time are:**

- complicated logistics involving more than one building or location in the scope of the ISMS;
- staff speaking more than one language (requiring interpreter(s) or preventing individual auditors from working independently) or documentation provided in more than one language;
- activities that require visiting temporary sites to confirm the activities of the permanent sites(s) whose management system is subject to certification (see paragraph below next list);
- high number of standards and regulations that apply to the ISMS.

**Example factors permitting less audit time are:**

- no/low risk product/processes;
- processes involving a single general activity (e.g. service only);
- high percentage of persons doing work under the organization's control performing the same tasks;
- prior knowledge of the organization (for example, if the organization has already been certified to another standard by the same certification body);
- high client preparedness for certification (for example, already certified or recognized by another 3rd party scheme);
- high maturity of the management system in place.

In situations where the certification client or certified organization provides their product(s) or service at temporary sites it is important that evaluations of such sites are incorporated into the certification audit and surveillance programmes.

## FSMS ISO 22000:2018 - AUDIT DURATION CALCULATION

### Initial audit duration calculation

The minimum initial certification audit duration for FSMS certification audits shall be given as  $D_S$ , expressed in days, which is calculated, considering [Table B.1](#):

$$D_S = (T_D + T_H + T_{FTE})$$

where

$D_S$  is the total audit duration;

$T_D$  is the basic site audit duration for (sub) category and scope of certification (includes one HACCP study), in days;

$T_H$  is the number of audit days for additional HACCP studies;

$T_{FT}$  is the number of audit days per number of FTE employees.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Page 24/45

**Table B.1 — Variables for calculation of minimum audit duration**

**Table B.1**

Category or subcategory		Basic site audit duration, in audit days $T_D$	Number of audit days for each additional HACCP study $T_H$	Effective number FTE $T_{FTE}$
	AI	1,0	0,25	
	AII	1,0	0,25	
	BI	1,0	0,25	
	BII	1,0	0,25	
	BIII	1,0	0,25	
<b>IAS-C</b>	<b>CO</b>	<b>2,0</b>	<b>0,50</b>	
<b>IAS-C</b>	<b>CI</b>	<b>2,0</b>	<b>0,50</b>	1 to 5 = 0
<b>IAS-C</b>	<b>CII</b>	<b>2,0</b>	<b>0,50</b>	6 to 49 = 0,5
<b>IAS-C</b>	<b>CIII</b>	<b>2,0</b>	<b>0,50</b>	50 to 99 = 1,0
<b>IAS-C</b>	<b>CIV</b>	<b>2,0</b>	<b>0,50</b>	100 to 199 = 1,5
	D	1,0	0,50	200 to 499 = 2,0
	E	1,5	0,50	500 to 999 = 2,5
<b>IAS-F</b>	<b>FI</b>	<b>1,0</b>	<b>0,50</b>	> 1 000 = 3
<b>IAS-F</b>	<b>FII</b>	<b>1,0</b>	<b>0,5</b>	
<b>IAS-G</b>	<b>G</b>	<b>1,5</b>	<b>0,25</b>	
	H	1,5	0,25	
	I	1,5	0,50	
	J	1,5	0,50	
	K	2,0	0,5	

**IAS-C, F,G, the EBS are accreditation in IAS/ MSCB-347**

If there are multiple categories or subcategories, use the category or subcategory with the highest  $T_D$  value to determine  $D_S$ . The combined parameters (HACCP study, FTE) for all the categories/ subcategories shall be used when calculating the audit duration.

When the scheme requirements encompass other interrelated elements [e.g. good agricultural practice (GAP), agronomic] audited in conjunction with the FSMS, these shall be included in the minimum audit duration.

The resulting audit duration using the factors in [Clause B.2 standard ISO 22003-1:2022](#) and [Table B.1 standard ISO 22003-1:2022](#) shall be justified and documented.

A minimum 50 % of total audit duration shall be spent on auditing the operational food safety planning and the implementation of PRPs and control measures.

NOTE 1 Operational food safety planning does not include activities related to FSMS development, training, internal audit, management review and improvement.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	<b>Page 25/45</b>

In cases of a FSMS which is integrated with another relevant management system or food safety system (FSS), a reduction in audit duration is possible. The combined audit duration shall be determined and recorded as follows:

- calculate the audit duration for each scheme separately (including scheme restrictions and allowed reductions);
- add the audit durations together;
- determine the degree of reduction considering a maximum of 20 % reduction can be made on the combined duration. The reduction range based on integration is 0 % to 20 % determined by the level of integration of overall business strategy, management reviews, approach to policy, objectives, systems, processes, internal audits and effective corrective action to prevent reoccurrence.

NOTE 2 “Relevant management system” means a quality or food safety system which covers the same processes, products and services.

Deviations from [Table B.1 in standard ISO 22003-1:2022](#) can be justified and shall be recorded, determined by factors such as maturity of the management system, prior knowledge of client processes and systems (e.g. already certified by same certification body to different scheme), client preparedness (e.g. already certified by a relevant third-party scheme) and a high level of automation.

### **Multi-site certification**

The site audit duration of the central function shall be equal to or greater than  $D_S$ .

The site audit duration for each site audited shall be equal to or greater than half of  $D_S$  for that site.

### **Calculation of minimum surveillance and recertification audit duration**

The minimum surveillance audit duration shall not be less than one third of the initial certification audit duration, with a minimum of 1 audit day (0,5 audit day for categories A and B).

The minimum recertification audit duration shall not be less than two thirds of the initial certification audit duration, with a minimum of 1 audit day (0,5 audit day for categories A and B).

**Source: ISO 22003-1:2022**

## **IMS INTEGRATE MANAGEMENT SYSTEMS / IAF MD 11:2013**

**E** Sufficient time is allocated to accomplish a complete and effective audit of the organization’s management system for the management system standards/specifications covered by the scope of the audit.

**D.1** To determine the audit time for an audit of an IMS covering two or more management system standards/specifications, e.g. A + B + C, the EBS shall:

- a) calculate the required audit time for each management system standard/specification separately (applying all relevant factors provided for by the relevant application documents and/or scheme rules for each standard, e.g., IAF MD5, ISO/TS 22003, ISO/IEC 27006);
- b) Calculate the starting point T for the duration of the audit of the IMS by adding the sum of the individual parts (e.g.  $T = A + B + C$ );
- c) Adjust the starting point figure by taking into account factors that may increase or reduce (see Annex 1) the time required for the audit.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	<b>Page 26/45</b>

The factors for reduction shall include but are not limited to:

- i) The extent to which the organization's management system is integrated;
- ii) The ability of the organization's personnel to respond to questions concerning more than one management systems standard; and
- iii) The availability of auditor(s) competent to audit more than one management system standard/specification.

The factors for increases shall include but are not limited to:

- i) The complexity of the audit of an IMS compared with single management system audits.
- d) inform the client that the duration of an IMS audit based on the declared level of integration of the organisation's management system may be subject to adjustment on the basis of confirming the level of integration at stage one and subsequent audits.

**D.2 Audit of an IMS could result in increased time, but where it results in reduction, it shall not exceed 20% from the starting point T (D1, b).**

**D 3** The starting point figure and justification for increase or reduction shall be documented.

**D 4** Existing application documents (e.g., IAF Mandatory Documents) relating to audits of management systems standards/specifications need to be considered when developing audit program and audit plans for an IMS.

**D 5** All applicable requirements of each management system standard/specification relevant to the scope of the IMS shall be audited.

**D 6** Audit reports can be integrated or separate, with respect to the management systems audited. Each finding raised in an integrated report shall be traceable to the applicable management system standard(s)/specification(s).

**D 7** The Certification Body shall consider the impact that a nonconformity found for one of the management system standard(s)/specification(s) has on the compliance with the other management system standard(s)/specification(s).

## **ANNEX 1 – REDUCTION OF AUDIT TIME**

Figure 1: This figure illustrates the reduction (%) in integrated audit duration and its relationship to: Vertical axis: the level of integration of an organization's management system (see below), which should include a consideration of the auditee's ability to respond to multi-aspect questions. An Integrated Management System results when an organization uses one single management system to manage multiple aspects of organizational performance. It is characterized by (but not limited to): to manage multiple aspects of organizational performance. It is characterized by (but not limited to):

1. An integrated documentation set, including work instructions to a good level of development, as appropriate;
2. Management Reviews that consider the overall business strategy and plan;
3. An integrated approach to internal audits;
4. An integrated approach to policy and objectives;
5. An integrated approach to systems processes;
6. An integrated approach to improvement mechanisms, (corrective and preventive action; measurement and continual Improvement); and,
7. Integrated management support and responsibilities.

## ANNEX 1 – REDUCTION OF AUDIT TIME

Figure 1

*Ability to perform combined audit %*

Figure 1: This figure illustrates the reduction (%) in integrated audit duration and its relationship to: Vertical axis: the level of integration of an organization's management system (see below), which should include a consideration of the auditee's ability to respond to multi-aspect questions. An Integrated Management System results when an organization uses one single management system.

**Source: P 10-07 and IAF MD 11:2013**

Due to available competence of each auditor to more than one set of audit criteria/standards, efficiencies are gained and go into the calculation of the possible reduction of time in the formula above. These include:

1. Time saved due to one opening and one closing meeting;
2. Time saved as one integrated audit report is produced;
3. Time saved in optimized logistics;
4. Time saved in auditor team meetings; and,
5. Time saved auditing common elements simultaneously, e.g. document control.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo	
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>	Page 28/45

IAF MD 11:2013

*International Accreditation Forum, Inc.*

Issue 1  
Version 3

**IAF Mandatory Document for the Application of ISO/IEC 17021  
for Audits of Integrated Management Systems**

Page 11 of 12

The Certification Body must decide the percentage level of integration based upon the extent to which the organization's management system meets the above criteria.

And

**Horizontal axis:** The extent, given as a ratio to be multiplied by a factor of 100 in order to achieve the extent given as percentage, to which individual audit team members are qualified:

$$\frac{100 ((X_1-1) + (X_2-1) + (X_3-1) + (X_n-1))}{Z(Y-1)}$$

Where

X1, 2, 3...n is the number of standards for which an auditor is qualified relevant for the scope of the integrated audit;

Y is the number of management system standards to be covered by integrated audit;  
Z is the number of auditors.

Example:

An integrated audit team of three auditors covering three different management system standards. One auditor is qualified for all three standards; one auditor is qualified for two of the standards and the other auditor is qualified for one standard. The percentage figure to be used for the horizontal axis is:

$$\frac{100 ((3-1) + (2-1) + (1-1))}{3(3-1)} = 50 \%$$

Due to available competence of each auditor to more than one set of audit criteria/standards, efficiencies are gained and go into the calculation of the possible reduction of time in the formula above. These include:

1. Time saved due to one opening and one closing meeting;
2. Time saved as one integrated audit report is produced;
3. Time saved in optimized logistics;
4. Time saved in auditor team meetings; and,
5. Time saved auditing common elements simultaneously, e.g. document control.

## FSMS- ISO 22000:2018

### CATEGORY AND SUBCATEGORY

**Tabele based on ISO 22003-1:2022**

Cluster <sup>a</sup>	Category	Subcategory	Examples of included activities	
Primary production	A	Farming or handling of animals	AI	Farming of animals for meat/milk/eggs/honey Raising animals (other than fish and aquaculture) used for meat production, egg production, milk production or honey production. Growing, keeping, trapping and hunting (slaughtering at point of hunting). Associated temporary packing without modification or processing of the product.
			AII	Farming of fish and seafood Raising fish and seafood used for meat production. Growing, trapping and fishing (slaughtering at point of capture). Associated temporary packing without modification or processing of the product.
	B	Farming or handling of plants	BI	Farming – Handling of plants (other than grains and pulses) Growing or harvesting of plants (other than grains and pulses): horticultural products (fruits, vegetables, spices, mushrooms, etc.) and hydrophytes for food. On farm storage of plants (other than grains and pulses), including horticultural products and hydrophytes for food.
			BII	Farming – Handling of grains and pulses Growing and harvesting of grains and pulses for food. Handling grains and pulses. On farm storage of grains and pulses for food.
			BIII	Pre-process handling of plant products Activities on harvested plants that do not transform the product from original whole form, including horticultural products and hydrophytes for food. These include cleaning, washing, rinsing, fluming, sorting, grading, trimming, bundling, cooling, hydro-cooling, waxing, drenching, aeration preparing for storage or processing, packing, repacking, staging, storing and loading.
Processing food for humans and animals	C	Food, ingredient and pet food processing	CO	Animal – Primary conversion Conversion of animal carcasses intended for further processing including lairage, slaughter, evisceration, bulk chilling, bulk freezing, bulk storage of animals and game gutting, bulk freezing of fish and storage of game.
			CI	Processing of perishable animal products Processing and packaging including fish, fish products, seafood, meat, eggs and dairy requiring chilled or frozen temperature control. Processing of pet food from animal products only.
			CII	Processing of perishable plant-based products Processing and packaging including fruits and fresh juices, vegetables, grains, nuts, pulses, frozen water-based products, plant-based meat and dairy substitutes. Processing pet food from plant products only.
			CIII	Processing of perishable animal and plant – Products (mixed products) Processing and packaging including pizza, lasagne, sandwiches, dumplings and ready-to-eat meals. Includes off-site catering kitchens. Includes products of industrial kitchens not offered for immediate consumption. Processing perishable pet food from mixed products
			CIV	Processing of ambient stable products Processing and packaging of products stored and sold at ambient temperature including canned foods, biscuits, snacks, oil, drinking water, beverages, pasta, flour, sugar and food-grade salt. Processing ambient stable pet food.

<b>EBS</b>	Name of Document:	Certification procedure and instructions for using the certificate and logo		
Document type:	<b>Procedure</b>	Form: <b>P 10-01 / Public</b>		<b>Page 45/45</b>

	D	Feed and animal food processing			Processing feed material intended for food and non-food producing animals not kept in households, e.g. meal from grain, oilseeds, by-products of food production. Processing feed mixtures, with or without additives, intended for food-producing animals, e.g. premixes, medicated feed, compound feeds.
Catering /food service	E	Catering/food service			Open exposed food activities such as cooking, mixing and blending, preparation of components and products for on-site direct consumer consumption or take away. Examples include restaurants, hotels, food trucks, institutions, work places (school or factory cafeteria), including retail with on-site preparation (e.g. rotisserie chicken). Includes reheating of food, event catering, coffee shops and pubs.
Retail, transport and storage	F	Trading, retail and e-commerce	FI	Retail / wholesale	Storage and provision of finished products to customers and consumers (retail outlets, shops, wholesalers). Includes minor processing activities, e.g. slicing, portioning, reheating.
			FII	Brokering/trading	Buying and selling products on its own account without physical handling or as an agent for others of any item that enters the food chain.
	G	Transport and storage services			Storage facilities and distribution vehicles for perishable food and feed where temperature integrity shall be maintained. Storage facilities and distribution vehicles for ambient stable food and feed. Relabelling/repackaging excluding open exposed product materials. Storage facilities and distribution vehicles for food packaging material.
Auxiliary services	H	Services			Services provisioned related to the safe production of food and feed including water supply, pest control, cleaning services and waste disposal.
Packaging material	I	Production of packaging material			Production of packaging material in contact with food, feed and animal food. May include packaging produced on-site for use in processing.
Auxiliary equipment	J	Equipment			Equipment for food, feed or packaging processing, vending machines, kitchen equipment, processing utensils, filters, hygienic design of equipment and facilities.
Bio/chemical	K	Chemical and bio-chemical			Production of food and feed processing aids, additives (e.g. flavourings, vitamins), gases and minerals. Production of bio-cultures and enzymes.
<p><sup>a</sup>Clusters can be used for accreditation scope of accredited certification bodies, and for accreditation bodies witnessing certification bodies.</p> <p>NOTE “Perishable” can be considered as food of a type or condition such that it can spoil and must be preserved in a temperature controlled environment.</p>
